EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John D. Reed on 9/12/08.

The application has been amended as follows: In the claims **please cancel claims 1-17.**

In the specification please amend paragraph [0001] as follows:

[0001] This application is a continuation in part of U.S. application Serial No. 10/664,329, filed Sep. 17, 2003, now U.S. Patent No. 6,939,633, issued Sep. 6, 2005, and is related to commonly assigned U.S. patent application Serial No. 10/739,463, filed Dec. 18, 2003, the entire disclosure of which is herein incorporated fully by reference.

Response to Arguments

Applicant's arguments, see Remarks, filed 9/2/08, with respect to the rejection of claims 18-29 have been fully considered and are persuasive. The rejection of claims 18-29 has been withdrawn.

Allowable Subject Matter

Claims 18-29 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest a combustor located in the cathode inlet path that receives hydrogen and oxygen and combusting the hydrogen and oxygen to form a purging fluid and circulating said purging fluid until a voltage measured across the fuel cell reaches a predetermined level. There is also no motivation to modify the prior art to include a combustor in the cathode inlet for reacting hydrogen and oxygen before entering the fuel cell stack at the cathode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
